311 Seiten

Kurzbeschreibung

Most of the volumes of the series "Süßwasserflora von Mitteleuropa" are written in German language, the volumes 2/1 - 2/4 dealing with the Bacillariophyceae (diatoms) as well. They enable the user to identify all diatom-species and provide him with the taxonomic and ecological information. Since the number of the known diatoms-taxa has increased considerably it is extremely important to distinguish the different species. This was until now restricted to the limnologists, biologists and geographers capable of understanding the German language. This additional volume 2/5 presents all the dichotom keys from the Bacillariophyceae-volumes 2/1 - 2/4 in English and French translation. They user can work through the key, identify the species and then - if necessary - gather the further information from the German volumes. 1: Chrysophyceae und Haptophyceae 2/1: Bacillariophyceae: Naviculaceae 2/2: Bacillarioph.: Bacillariaceae, Epithemiaceae, Surirellaceae 2/3: Bacillarioph.: Centrales, Fragilariaceae, Eunotiaceae 2/4: Bacillarioph.: Achnantheaceae 2/5: Bacillarioph.: English and French translation of the keys 3/1: Xanthophyceae 4/2: Xanthophyceae 2 6: Dinophyceae Dinoflagellida 9: Chlorophyta I: Phytomonadina 10: Chlorophyta II: Tetrasporales, Chlorococcales, Gloeodendrales 14: Chlorophyta VI: Oedogoniophyceae: Oedogoniales 16: Chlorophyta VIII: Conjugatophyceae I: Zygnemales 19/1: Cyanoprokaryota I Chroococcales 19/2: Cyanoprokaryota. Oscillatoriales 20: Schizomycetes Synopsis

Most of the volumes of the series "Subwasserflora von Mitteleuropa" are written in German language, the volumes 2/1 - 2/4 dealing with the Bacillariophyceae (diatoms) as well. They enable the user to identify all diatom-species and provide him with the taxonomic and ecological information. Since the number of the known diatoms-taxa has increased considerably it is extremely important to distinguish the different species. This was until now restricted to the limnologists, biologists and geographers capable of understanding the German language. This additional volume 2/5 presents all the dichotom keys from the Bacillariophyceae-volumes 2/1 - 2/4 in English and French translation. They user can work through the key, identify the species and then - if necessary - gather the further information from the German volumes. Über den Autor und weitere Mitwirkende

((b))Autoren((/b)): Professor Dr. Horst Lange-Bertalot (Abtlg. für spezielle Botanik, 'Niedere Pflanzen' am Botanischen Institut der Universität Frankfurt am Main) und Dr. Kurt Krammer (Institut für Oberflächenanalyse in Meerbusch). ((b))Übersetzer((/b)): Dr. Jean Prygiel et al. (Agence de l'Eau Artois-Picardie, Douai, FRANKREICH) und Nina Bate (Freshwater Sciences, Environment Protection Authority, Melbourne, AUSTRALIEN)
