The Banerji Protocols - A New Method of Treatment with Homeopathic Medicines Prasanta Banerji Pratip Banerji

The Banerji Protocols are a new system of Medicine, in which Specific Homeopathic Medicines are prescribed for Specific Diagnosis of Disease. It can be said that they are the fruits of a cumulative experience and careful analysis of observed trends in patient-medicine interaction and the translation of the same into a system of prescribing with a view to standardize and make easy the practice of an extremely complex system of medicine using homeopathic medicines. At the clinics of our research foundation, we do not practice classical homeopathy. We have developed a method of treatment in which specific medicines are prescribed for specific diseases. Diseases are diagnosed using modern state-of-the-art scientific methods. This is done because modern diagnostic approaches incorporate and help in the selection of medicines, so that specific medicines can be easily prescribed for specific diseases. With the passage of time and the availability of new diagnostic tools like ultrasonography, magnetic resonance imaging, cancer biomarkers and other advanced tests, we have been able to further streamline our treatment protocols. The efficacy of this approach is reflected in the encouraging results of our new method of treatment, which we call the Banerji Protocols.
